English — A2, reading technical documentation

SKILLS

Programming languages

Dart · Java · Kotlin · C# · Python

Mobile development

Flutter · BLoC · MobX · go_router · Dio · WebSocket · sqflite · Firebase · web3dart · WalletConnect · Jetpack Compose

Tools and DevOps

Git · CI/CD · Deployment · Mason · Figma · Penpot

Focus areas

Fintech and crypto · Web3 integrations · App architecture · Design systems and UI/UX · Performance optimization · Security · Code review and task planning

EDUCATION

Tomsk College of Information Technologies

Information Systems and Programming · 2018 – 2021

1st place at the regional WorldSkills championship, Mobile Applications Development (2020)

Alexander Dogaev

Flutter Developer · Middle+

Flutter developer with 5+ years of commercial Flutter experience, after 1.5 years of Java development. At Crypton Studio I spent 4.5 years building crypto and fintech apps: exchanges, wallets and neobanks. I take apps from architecture to release on the App Store and Google Play: I design architecture and design systems, review code and plan the team's work.

KEY ACHIEVEMENTS

- Lead developer of a mobile crypto exchange: charts and order book hold 60+ FPS under a live WebSocket quote stream
- Built the company Starter Kit (Clean Architecture, Mason templates, code generation from Swagger) — 3+ projects started on it
- Sports prediction app: 50K+ installs and 4.2★ on Google Play
- 1st place at the regional WorldSkills championship, Mobile Applications Development (2020)

EXPERIENCE

Flutter Developer (Middle+)

07.21 – 01.26 · 4.5 years

Crypton Studio

- Building crypto and fintech mobile apps: exchanges, wallets, neobanks
- Designing architecture (BLoC, clean architecture, modular structure of internal packages) and design systems; code review
- Trading modules, WebSocket quotes, precise money calculations (decimal), 2FA and biometrics
- Web3 integrations: web3dart, WalletConnect (MetaMask, Trust Wallet), ECDSA/secp256k1 transaction signing
- Internal tooling: the company Starter Kit (3+ projects started on it), code generation from Swagger APIs, Mason templates, a chart drawing tools package
- Performance optimization to 60+ FPS
- Leading project cycles: planning, task assignment, tracking and reporting
- Building, testing and publishing to the App Store and Google Play

Java Developer

02.20 – 06.21 · 1 year 5 months

Mirball

- Desktop apps for managing and monitoring compute nodes and farms
- PostgreSQL and data model design
- UI built with JavaFX

PROJECTS

Crypto exchange and swap service

10.2024 – 01.2026

A mobile exchange app: trading, market watching, verification. WebSocket quotes feeding the order book and charts. Chart drawing tools extracted into a separate package. Money calculations with decimal. 2FA, biometrics, KYC.

Charts and order book hold 60+ FPS under a live quote stream

Flutter · BLoC · WebSocket · decimal · Firebase

Fintech platform (neobank)

12.2024 – 06.2025

Multi-currency accounts for crypto and fiat operations. Real-time updates via Centrifugo and protobuf. PIN and biometric sign-in, KYC. Wallets via WalletConnect. Rive animations.

Flutter · BLoC · Centrifugo · protobuf · WalletConnect

Sports prediction app

03.2024 – 11.2025

Predictions on sports events with leagues and leaderboards. Offline access and caching. In-app purchases. Firebase: push notifications, analytics, dynamic links.

50K+ installs and 4.2★ on Google Play

Flutter · BLoC · Firebase · In-app purchases

Connected car app

11.2022 – 01.2024

Controlling car features from a phone. Reactive MQTT connection. Climate control and central locking. Radio and playlists. Maps and routes on a Yandex MapKit fork.

Flutter · BLoC · MQTT · rxdart · Yandex MapKit

Job app with a crypto wallet

12.2021 – 08.2022

Job search with user roles and a built-in crypto wallet. Role-based access. WebSocket chats. Google Maps. Wallet on web3dart and WalletConnect.

Flutter · MobX · WebSocket · web3dart

Fitness app

08.2021 – 11.2021, 09.2022 – 10.2022

Social features and activity tracking for people who work out. Camera stories with video processing. Voice messages in chat. Bluetooth smart scales and health data. In-app purchases.

Flutter · MobX · Bluetooth · HealthKit/Health Connect

Wayback open source

2026

Get back to a saved spot without an internet connection. Offline-first navigation by GPS and compass. Clean architecture and Bloc. Custom design system with a live demo. Designs in Penpot.

Open source, live design system demo, APK in releases

Flutter · Bloc · GPS · Penpot · github.com/Dogayo/wayback

Commercial projects are under NDA and described without names. Updated: November 2026.
